

# Medical Associates Health Plan 2018 Formulary List

The 2018 Formulary drug list is shown below. The formulary is the list of drugs included in your prescription drug benefit plan. Inclusion on the list does not guarantee coverage. Unless otherwise stated, generic drugs are subject to Tier 1 copayments and formulary brands are subject to tier 2 copayments. Brand name drugs may move to non-formulary status if a generic version becomes available during the year. Not all the drugs are covered by all prescription drug benefit programs. It is important to check your benefit materials for more information on coverage. For specific questions about your coverage, please call MAHP during business hours at 1-866-821-1365 or 1-563-584-4885 or Magellan Rx Management after hours and on holidays at 800-424-5947.

---

**For the member:** Generic medications contain the same active ingredients as their corresponding brand-name medications, although they may look different in color or shape. They have been FDA-approved under strict standards.

**For the provider:** Please prescribe preferred products and allow generic substitutions when medically appropriate.

**Please note** the Quantity Limits may be listed at a per day value (example: inhalers, solutions, and vials). For most products, a month's supply can be calculated by multiplying by 30. Also, quantity limits are typically not listed by the number of packages, but instead by number of tablets, capsules, or milliliters to name a few.
